

MAESTROLOTO

SKU:MLH06

- **CATEGORY:** Gate Valve Lock Hand Wheel Globe Valve Lock
- **Material:** Engineering Plastic ABS
- **Dimension:**13 "- 18 " (330mm – 450mm)
- **Color:** Red
- **Quantity:** Pcs

Product Features)

- Gate valve locks are suitable for valve handles with diameters from 330mm to 450mm and are used around the valve operating handle to prevent accidental opening of the valve.
- The strong, lightweight, insulated thermoplastic housing withstands chemicals and operates effectively in extreme conditions.
- Includes high-visibility permanent security labels.

Product Description

- Made of engineering plastic ABS.
- It is specially designed for locking gate valves with a handwheel diameter of 330mm-450mm.
- M-H06B~M-H07B adopts different sizes of semi-circular design, which can be combined into one when storing or carrying, reducing the volume by half, and making it easy to store and manage. It can be locked with 2 safety padlocks with a lock beam diameter of $\leq 7\text{mm}$.
- Appearance: red, other colors need to be customized. Warning labels are available in English.
- Transparent style can be customized, made of engineering plastic PC, high temperature resistance, impact resistance.

Product Dimension

Lock body color	Red
Diameter	To be measured
Lock height	To be measured
Lock width	To be measured
Lock body material	Engineering plastic ABS
Valve handwheel diameter range	330mm-450mm
Maximum operating temperature	148°C
Minimum operating temperature	-40°C
Maximum number of padlocks	1 pc
Maximum usable lock beam diameter	7mm
Lock type	Split

Label description	Danger Locked Please do not remove
Label language	Chinese and English
wrap	Plastic bag + carton packaging
Type of risk	Mechanical risk
